Why Builders Choose Premo Steel

From day one, we set out to be the premium steel package in the industry—and that's exactly what "Premo" stands for.

We don't just sell buildings. We walk every client through the design, engineering, and delivery process like it's our own project. Every structure is designed to go up quickly, fit right the first time, and perform for decades.

While others cut corners, we stay hands-on from start to finish:

- Design
- Drafting
- Engineering
- Manufacturing
- Shipping Service

Compare us to the rest, and you'll see—nobody backs their buildings like Premo.

THE TOTAL PACKAGE

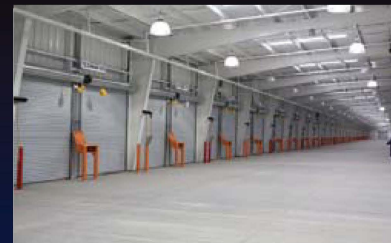

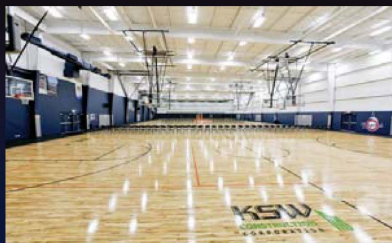

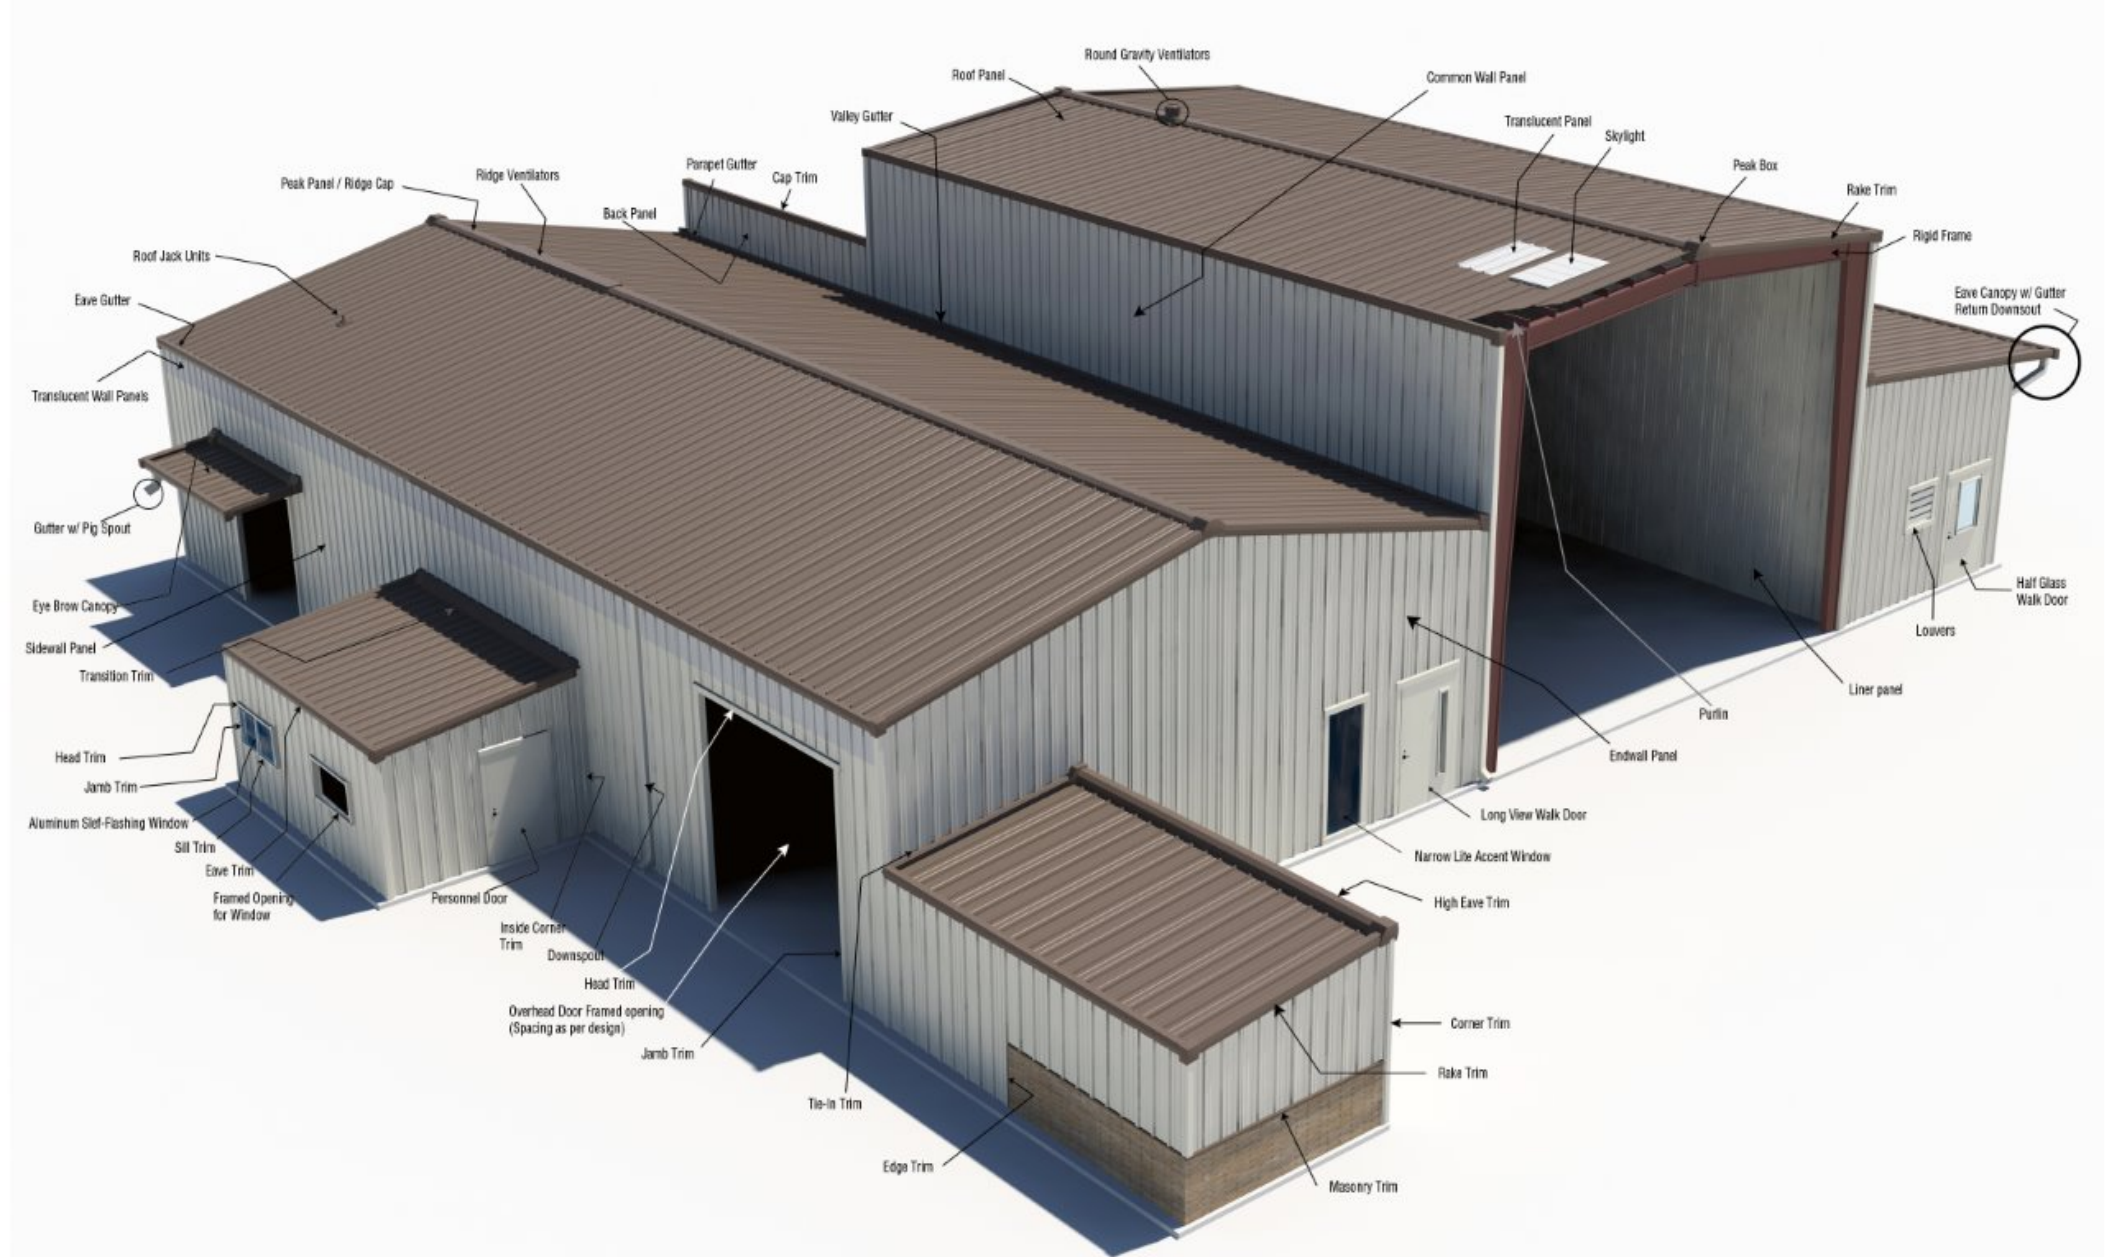

No matter what you're building—barn, garage, shop, or something big, Premo has the experience and the system to get it done right.

We've delivered buildings for:

- Agricultural operations
- Residential and custom garages
- Commercial and industrial sites
- Institutional and specialty builds

Tell us what you're working on, and we'll show you how we'd build it!

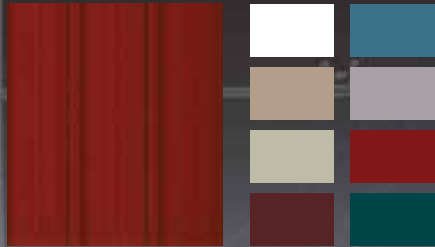

Accessories and Add-Ons

Premo Steel Buildings offers a full range of accessories to increase performance, protect your structure, and give it a polished, finished look. Choose from a variety of color and trim combinations, insulation options, overhangs, gutters, downspouts, liner panels, and more.

Need something specific? Just ask—we'll help you fine-tune your building exactly how you want it.

Wall & Roofing Panels

Premo Buildings come Standard with 26 GA. Roof and Wall panels. All of our colors are available on any of our buildings. Color options are something that your Premo building expert will discuss with you in great detail.

Insulation

Premo offers laminated fiberglass blanket insulation in a variety of thicknesses and R-value ratings, as well as thermal-efficiency systems for both interior walls and ceilings that provide a more finished appearance while helping to make the building quiet and comfortable.

Overhangs, Gutters and Downspouts

Protect your foundation and property from erosion and water damage while beautifying your structure with optional overhangs, gutters and downspouts. Made from light gauge materials and available in many attractive trim colors, these systems are hemmed for a strong, smooth and corrosion-resistant edge for years of beautiful functionality.

Wainscot

Optional wainscot in contrasting colors can give your building a highly distinctive feel and enhances the appearance of any structure. Premo offers several different wainscot style and application methods to suit virtually any style and budget.

Interior Finishing

Finishing the inside of your building with steel liner panels adds style and energy efficiency. Roof and wall liner panels are available in 26 or 29-gauge in your choice of standard colors. Liner panel packages come complete with trim and fasteners for installation.

Exterior Facades

Premo offers a variety of Canopy, Mansard and Parapet exterior options that can add a distinctive flair to your structure while providing added surface for signage.

**We would like to take the time to thank Jim from Premo Steel Buildings. He handled our entire project better than we ever thought possible. Thanks again Jim.
Ron Woodard, Shingle Springs CA.**

**Thanks for your guidance on our shop building.
We are now moved in and love our new facility.
Paul and Karen, Bakersfield CA.**

**Tom, I have put up many of these buildings in the past and I just wanted to take a moment to let you know that this building was the smoothest I have ever been involved with. Good job Premo.
Ben Childes, Portland OR.**

**Thanks guys at Premo for your integrity throughout our process. We will definitely recommend you to our friends.
Jack and Carrie, Littleton CO.**

Premo Typical Frame Types

Clear Span Gable

Clear Span Single Slope

Multi Span

Lean-To

Clear Span Gable frame design makes up about 50% of all steel buildings. They are a very efficient way to design a building and can give great erection cost savings.

Single Slope buildings are a great way to design commercial buildings and buildings with large storefront appearances such as strip malls.

Multi Span buildings are typically large buildings over 80' wide. These buildings have interior support columns.

Lean-to buildings are a great way to accomplish separate office areas, storage or even open parking areas. They are very versatile.
